Education

Cebu Technological University

Bachelor of Science in Information Technology

Expected July 2026

Cebu City, Philippines

Experience

Project Development (Security & Backend Focus)

Feb 2025 – Oct 2025

Cebu Technological University

Cebu City, Philippines

- Contributed to the development of a **Barangay Management System** for San Roque (Ciudad), Cebu City, with primary responsibility for application security and backend features.
- Implemented authentication, authorization, and data protection mechanisms to secure user accounts and sensitive resident information.
- Developed and integrated **Securado**, a real-time GPS and GSM tracking system capable of transmitting live coordinates to a cloud-based platform.
- Worked closely with team members and stakeholders to ensure system security, reliability, and alignment with user requirements.

Technical Training Instructor (Student Role)

Aug 2025 – Oct 2025

Barangay San Roque (Ciudad)

Cebu City, Philippines

- Assisted in delivering the **BarangayConnect Training Program**, helping residents become familiar with digital tools and applications.
- Explained system functions and guided users through common tasks within the barangay management system.
- Supported practical training activities aimed at enhancing basic computer and system usage skills.

Projects

Securado | *Web, Mobile, IoT*

React, TypeScript, Django, PostgreSQL

- Developed web and mobile interfaces using React and React Native (Expo), integrated with a RESTful Django backend.
- Designed and integrated a GPS- and GSM-enabled tracking device using ESP32 for real-time location monitoring.
- Implemented cloud-based telemetry and modular solar charging to support continuous device operation.

Barangay San Roque (Ciudad) | *Web, Mobile*

React, TypeScript, Django, PostgreSQL

- Contributed to a cross-platform barangay management system by implementing secure login and user authentication.
- Implemented access controls and data protection measures to ensure resident information remained secure.
- Facilitated real-time monitoring of system access and potential security threats.
- Set up CI/CD pipelines for smooth deployment and integration with security checks.

Technical Skills

Languages: Python, Java, JavaScript (TypeScript), SQL, NoSQL, HTML, CSS

Frameworks: React, Django, Node.js, Flask, FastAPI, TailwindCSS

Databases: PostgreSQL, MySQL, Supabase, MongoDB

Developer Tools: Git, GitHub, Postman, VS Code
